

Main Training Scheme

The contents of the International Training Program of Waste to Energy include:

- The current state and policy for waste management in China.
- Theory and mechanism of waste to energy through incineration, pyrolysis and gasification, etc.
- Practical applications of technology for solid waste management, including municipal solid waste incineration (MSWI) system, sludge drying incineration system, hazardous waste disposal plant, etc.
- Control and elimination of pollutants from waste incineration.
- Design, operation and management of MSWI system.
- Investment and profit of MSWI plant.

Technical tours to waste to energy plant and hazardous waste disposal and incineration system are also arranged.

Teaching Staff: Xiaodong Li (Zhejiang University), Alfons Buekens (Vrije Universiteit Brussel), Yong Chi (Zhejiang University), Xuguang Jiang (Zhejiang University), Fei Wang (Zhejiang University), Shengyong Lu (Zhejiang University), Qunxing Huang (Zhejiang University), Mi Yan (Zhejiang University of Technology), Pinjing He (Tongji University), Guangjie Zhao (China United Engineering Company)
